

Environmental Policy Statement

In the pursuit of our mission to deliver a customer focused, quality driven value for money service, JTL recognise that our activities inevitably have an impact on the environment. We believe that all businesses should be responsible for aspiring to good environmental practice and operating in a sustainable manner. We are therefore committed to reducing our environmental impact and continually improving our environmental performance as an integral and fundamental part of our business strategy and operating methods.

It is our priority to encourage our customers, sub-contractors and all business associates to do the same. Not only is this sound commercial sense for all; it is also a matter of delivering on our duty of care towards future generations.

Our policy is, wherever practically possible and financially viable, to:

- Wholly support and comply with or exceed the requirements of current environmental legislation and codes of practice.
- Minimise our waste and then reuse or recycle as much of it as possible in keeping with current regulations relevant to its disposal.
- Minimise energy and water usage in our buildings, vehicles and processes in order to conserve supplies, and minimise our consumption of natural resources, especially where they are non-renewable.
- Operate and maintain company vehicles with due regard to environmental issues and encourage the use of alternative means of transport and car sharing as appropriate.
- Apply the principles of continuous improvement in respect of air, water, noise and light pollution to our premises and seek to reduce any impacts from our operations on the environment and local community.
- Purchase products and services that do the least damage to the environment and encourage others to do the same.
- Ensure that all employees understand our Environmental Policy and conform to the high standards it sets.
- Address complaints about any breach of our Environmental Policy promptly and to the satisfaction of all concerned.
- Update our Environmental Policy regularly in consultation with relevant parties.
- When procuring, refurbishing and refitting JTL estate, energy efficient solutions are considered and implemented - examples include LED lighting and A* rated boilers.
